CAREER OBJECTIVE

Motivated and detail-oriented Software Developer fresher with hands-on knowledge of HTML, CSS, JavaScript, React JS, Flask, and MySQL. Skilled in building full-stack web applications with clean, responsive interfaces and efficient backend logic. Eager to apply strong problem-solving abilities and project experience to contribute to a dynamic development team.

EDUCATION

Master of Computer Applications (MCA) - CGPA 91

Arcot Sri Mahalakshmi Institute of Management and Computer Applications

2027

Bachelor of Computer Applications (BCA) - CGPA 84

Arcot Sri Mahalakshmi Women's College

2025

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, React JS, Flask

Web Technologies: HTML, CSS, Bootstrap

Database & Tools: MySQL, GitHub

PROJECTS

A Verifiable Cloud Data Deduplication Scheme

HTML, CSS, JavaScript, JDBC

- Designed a secure cloud deduplication system using convergent encryption to reduce redundant data while preserving data integrity.
- Integrated third-party auditing and cryptographic verification to enhance security and prevent unauthorized data modification.

Event Management System [Link](#)

HTML, CSS, JavaScript, Flask, Python, MySQL, SQLAlchemy, Chart.js

- Developed a full-stack web application with separate Admin and User modules to manage college event creation, registrations, and payments.
- Built an interactive admin dashboard using Chart.js for registration analytics and implemented a simulated UPI payment flow with automated receipt generation.
- Designed a MySQL database with SQLAlchemy ORM and implemented CRUD operations along with secure authentication for Admin and User roles.

Mealify – Meal Planner and Recipe Finder [Link](#)

React JS, JavaScript, TheMealDB API

- Built a responsive React application to fetch and display meals, recipes, and ingredients using TheMealDB REST API.
- Implemented a meal planner, favorites system, and JavaScript-based chatbot for personalized meal suggestions.

INTERSHIPS

Python Intern – Pemchip Infotech

May 2026 – June 2026

- Preprocessed structured CSV datasets using transformation layers, Label Encoding, and Standard Scaler for feature engineering.
- Implemented and compared SVM and Random Forest classifiers for predictive modeling using Python and Google Colab.
- Exported and saved the trained model for future deployment and reuse. Tech: Pandas, Scikit-learn, SVM, Regression.

Web Developer Intern – Sysslan IT Solutions [Link](#)

Aug 2026 – Sep 2026

- Built a responsive e-commerce website from scratch using HTML, CSS, and JavaScript, covering structure, styling, and product listings.
- Implemented interactive features including cart item count, a contact form, and expandable product details using DOM manipulation.
- Ensured cross-device responsiveness and consistent design across all sections of the website.

CERTIFICATIONS

- Web Development Fundamentals – IBM
- Fundamentals of Machine Learning and Artificial Intelligence – AWS
- Cloud Computing – NPTEL

ACHIEVEMENTS

- Won 1st Prize in Debugging event at the college technical symposium, showcasing strong logical reasoning and code analysis skills under time constraints.
